## **CHAPTER 4: Measurement of Consumption**

- 4.1 The Municipality must conduct an accurate measurement of the municipal services consumed by a customer at intervals determined in terms of the water and sanitation policies. Provided that nothing in this section prevents the Municipality from making an estimate of the consumption of municipal services for any relevant period if—
- a) the reading of the meter could not be obtained in respect of the period in question;
  - b) for any other reason the meter could not be accessed to be read.
- 4.2 Calculation of estimate: The season control must be set-up in BC420 to establish the months that are to be used in determining the differences between winter and summer averages. If the month in which the levy is going to be raised = August and the consumption is normally in July, then August must be marked as a “winter” month (=). It will use the last 12 (billed) normal readings, apply the season control and then add the consumptions together divided by the number of billing months involved.
- 4.3 Where a meter is installed but there is no history of consumption to calculate the interim, a default interim will be used.
- 4.4 The need to estimate consumption Notwithstanding all the Municipality’s attempts to take monthly meter readings of all water supplied, should it not be possible to take a reading (on-site or remotely) on the appropriate date, the Municipality reserves the right to calculate an estimated consumption from the previous actual reading to the billing date. The estimates are normally based on the seasonal historical average consumption at the property but may be adjusted by the Municipality to reflect its best estimate of what the consumption may have been.
- 4.5 No person may sink a borehole on premises situated in a dolomite area, and before sinking a borehole a person must determine if the premises on which the borehole is to be sunk are situated within a dolomite area.

The municipality may, by public notice, require-

- (1) The owner of any premises within any area of the municipality upon which a borehole exists or if the owner is not in occupation of such premises, the occupier to notify it of the existence of a borehole on such premises, and provide it with such information about the borehole that it may require; and
- (2) The owner of the property who intends to sink a borehole on the premises, to notify it on the prescribed form of its intention to do before any work in connection sinking it, is commenced.
- (3) The municipality may require the owner of the premises who intends to sink a borehole, to undertake an environmental impact assessment of the intended borehole, to the satisfaction of the municipality, before sinking it.
- (4) The municipality may by notice to an owner or by public notice, require an owner who has existing borehole that is used for water supply services to-
  - (a) Obtain approval from it for the use of a borehole for portable water supply services in accordance with Section 6, 7 and 22 of the Act; and
  - (b) Impose conditions in respect of the use of a borehole for portable water services.

No reduction of amount payable for water wasted.

4.6 A consumer shall not be entitled to a reduction of the amount payable for water wasted or lost in a water installation, unless otherwise determined by the municipality under exceptional circumstances. Most often, leaks between the meter and the house are the responsibility of the homeowner; leaks from the meter or pipes leading from the main to the meter are the responsibility of the water utility. The water utility should be contacted before any attempt to repair the water supply pipe.

### **Adjustment to estimated account**

4.7 As soon as a new actual reading has been taken, the actual consumption will be recalculated, and the previously estimated consumption will be reversed and reflected in the subsequent account.

4.8 Consumptive tariffs will reflect the costs reasonably associated with rendering the service. The budgeted income and expenditure of the service, showing any

contributions to Rates and General Account(s), support services recharges and contributions from the Indigent Fund, must be provided as part of the annual report on the revision of rates and tariffs.

#### **Failure of Meter**

4.9 During the period from identification of a meter having ceased registering consumption, to when it is replaced and a reading can be taken, a standard rate of consumption will be applied. Should the owner / accountholder have been billed a zero consumption for any period of time, and it is subsequently found to have been due to a seized meter and the property was not vacant at the time or the usage pattern had not changed, the municipality may bill retrospectively in line with paragraph 4.4. Should the property have been vacant (permanently or temporarily) or where the usage pattern had changed, the onus rests on the customer to notify the Municipality as soon as possible via a signed and sworn affidavit for consideration. If such evidence is not on record, future claims will not be considered.
